### **DETAILED ACTION**

1. Claims 1 – 4 are pending.

#### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1 – 4 are rejected under 35 U.S.C. 102(b) as being anticipated by Shapiro (6,340,026).

Shapiro discloses a device for caring for toes comprising a body which is either tubular, flat, solid, or a sheet rolled material for moving between toes having a handle attached to end of the body by stitching or some other means (abstract). The handle can be a ring or loop material (abstract). The body is made from various materials including paper, cheesecloth, or 100% cotton to dry the area between toes (column 2, lines 50 – 60). The material made from 100% cotton would inherently be absorbent as well as plush. Further, Shapiro discloses that it is known to have a hollow body portion filled with a rod-shaped flexible fibrous material (column 2, lines 18 – 23). The tubular shaped device can be hollow or can be filled with a rolled or solid material (Figures 2 and 3). The filling material extends the entire length of the material and are integrally attached to the loops or handles at the end of the device. Therefore, claims 1 – 4 are rejected.
